### Software Test Engineer, Ercom Mobipass®, Vélizy 78

Dec, 2006 - Apr, 2013    6 years 3 months

Ercom, Mobipass®, I developed the Mobipass® project with a 5-100 person Télécom team to make it a recognized working software product. Mobipass® is a lab-based emulation product capable of precise reproduction of the behaviors of thousands of devices with mixed traffic calls and RF conditions experienced on a real network. Its easy-to-use GUI, advanced multi-UE channel emulator, integrated QoS and QoE test features and rich KPI capabilities make it a strong test and measurement addition for mobile network operators deploying advanced broadband networks. As Software engineer, I developed the GUI, User Interface in .NET C# language and did many tests on the TCP/IP Network.

- Processing Network Datagram Blocks: Cut & Reassemble, Encode & Decode
- Object Oriented Programming to Design and Develop the UI in C#.NET
- Night Builds, Continuous Integration and Validation Tests
